Seattle, WA

SOFTWARE ENGINEER

I am a French student completing my Master's degree in "Expert in Computer Science and Information Systems". I aim to move to Seattle, WA in October 2025. I am eager to create unique experiences within innovative and technological companies.

KEY COMPETENCIES

Python, C, C++, Java	React, Angular, NextJS	Proactive and self-motivated
Oracle, MySQL, MariaDB	Django, Springboot, PHP	Organisational skills
CI/CD (Gitlab/Jenkins), Docker	React Native, Swift, Flutter	Team worker

---

PROFESSIONAL EXPERIENCE

LotyApp   **April 2023 - Current**
CEO & CTO

- Established a digital loyalty program platform tailored for small and medium-sized businesses, incorporating a professional dashboard, a merchant mobile app, and a customer mobile app
- Designed and developed the entire tech stack, including NextJS, React Native and Django REST Framework
- Created and launched the company's marketing website (lotyapp.fr) using Webflow, focusing on clear communication of product features and benefits
- Led the company as both CEO and CTO, defining strategic direction, product vision, and roadmaps
- Developed the wireframes, prototypes, and final designs for the mobile apps and dashboard, ensuring an intuitive and engaging user experience
- Ensured the platform adhered to industry standards for data security and privacy, including GDPR compliance
- Deployed the NextJS App with Vercel and the Django API with OVH

RTE (Réseau de Transport et d'Electricité)   **September 2022 - September 2025**
Software Developer

- Development of a traceability application of actions and works on the high voltage network in France
- Full-Stack development with Angular and Django REST Framework
- CI and CD with Gitlab and Jenkins
- Worked with a SCRUM method as a developer and a Scrum Master sometimes
- Mentored 3 junior full-stack developers on the team on Angular and Django, and documented best practices within the organization
- Code quality and coverage with SonarQube
- Code refactoring, development of new modules, maintenance/evolution of the existing
- Automation of unit, functional and integration tests
- Worked inside of a 10 collaborators team (Tech Leads, Product Owners, Software Developers..)

Valve Precision   **September 2020 - September 2022**
Software Developer / IT Support

- Development of several web applications with PHP, JavaScript
- Maintenance and IT support for on-site employees
- Working in English with the German IT Manager and the World IT Manager working in USA

EDUCATION & CERTIFICATIONS

Master of Computer Science   Sept 2023 - Sept 2025
EPSI (French Engineering School)

Bachelor of Computer Science   Sept 2022 - Sept 2023
EPSI (French Engineering School)

Associate Degree of Computer Science   Sept 2020 - Sept 2022
University of Paris-Saclay

EXTRACURRICULAR ACTIVITIES

Piano, Guitar, Bass, Drums

Basketball
